🌐 [vladenskiy.github.io](https://github.com/vladenskiy)

📍 Istanbul, Turkey

## SKILLS

**Main:** React-Native, TypeScript, Redux-Toolkit

**Databases:** Firebase, SQLite, Realm

**Native Modules:** Java, Swift, Obj-C, Kotlin

**CI/CD:** Fastlane, Gitlab Runner, AppCenter

**Testing:** Jest, Detox, Mocha

**Modules:** HealthKit, Push-Notifications, Subscriptions, In-App Purchase, MapKit...

**Other:** Agile, Scrum, REST APIs, App Store & Google Play Publishing

## EDUCATION

**React Native Specialist**

**Meta (ex-Facebook)**

2022-2023

Certification ID: ATBVF6C99JC

[Certificate link](#)

**Bachelor's degree**

**Kazan Federal University**

2017-2021

Institute of Computational Mathematics and Information Technologies

## LANGUAGES

Russian

English

## PROFILE

I'm a mobile developer focused on building cross-platform iOS and Android applications using React Native. I started my journey in development by learning Swift and Java, which provided me with a strong understanding of native technologies. This background enables me to write Native Modules when necessary, bridging the gap between native capabilities and cross-platform solutions. My experience is dedicated entirely to mobile development, and I have successfully completed over 20 projects, allowing me to bring focused expertise to creating efficient and user-friendly mobile applications.

## WORK EXPERIENCE

### React Native Developer

Instadapp (Project Developer)

- Worked on the Avocado Wallet cryptocurrency wallet, focusing on internal browser functionality, transaction processing, and security.
- Developed and optimized the internal browser for seamless and secure interaction with decentralized applications (dApps).
- Implemented transaction handling features, ensuring accurate and efficient processing of crypto transactions.
- Enhanced security protocols, integrating multi-layer encryption and improving wallet data protection.
- Collaborated with backend teams to integrate blockchain transactions and ensure data consistency and real-time synchronization.
- Conducted rigorous testing and performance optimization to ensure the app's reliability and scalability for secure financial operations.

### React Native Developer | DevOps

Edostav (Project Developer)

- Developed a new version of the app for customers, adding new features and enhancing the overall user experience.
- Developed applications for couriers and partners, improving logistics and operational efficiency.
- Ensured seamless integration of customer-facing features with backend systems, optimizing performance and responsiveness across both iOS and Android platforms.
- Set up a custom CI/CD pipeline using Fastlane and GitLab Runner, automating build, testing, and deployment processes.
- Configured Fastlane for full app publishing functionality, including automatic app store submissions for both iOS and Android.
- Enhanced app architecture, focusing on scalability and maintainability for long-term project growth.
- Contributed to improving app security and optimizing performance for a better user experience.
- Supported the maintenance and monitoring of applications, ensuring optimal performance across all platforms.
- 200k+ downloads across various markets, 10k+ positive reviews, and 9 years of solid presence on both the App Store and Google Play, demonstrating the app's strong market reputation and reliability.

# VLADLEN KAVEEV

REACT NATIVE | DEVOPS | TEAMLEAD

## EXPERTISE

- **Mobile App Development:** Proficient in building cross-platform mobile applications with React Native, focusing on high-quality performance, scalability, and user experience across both iOS and Android.
- **Project Management:** Led teams in Agile Scrum methodology, managing project timelines, tasks, and team collaboration to ensure successful delivery of high-impact mobile applications.
- **CI/CD Setup:** Extensive experience in CI/CD pipelines using Fastlane, GitLab CI, and Jenkins to automate build, testing, and deployment processes, significantly improving efficiency and release cycles.
- **App Publishing & Maintenance:** Expertise in publishing apps to the App Store and Google Play, with a deep understanding of the submission process, versioning, and post-launch monitoring.
- **Security & Performance Optimization:** Focused on improving app performance and ensuring the security of sensitive data, utilizing best practices for both frontend and backend integrations.
- **Team Leadership & Mentorship:** Guided and mentored junior developers, ensuring best practices and improving team productivity through regular code reviews and knowledge sharing.
- **Native Modules Development:** Experienced in building custom Native Modules in both iOS and Android for integrating platform-specific functionality into React Native applications. This includes handling complex tasks such as background processing, custom UI components, and interfacing with native SDKs or third-party libraries to enhance app capabilities beyond the standard React Native APIs. Expertise in bridging native code with React Native to provide smooth and high-performance experiences for end-users.

## WORK EXPERIENCE

### React Native Developer | Team Lead

EtoSlon (Project Developer)

- Led a small development team, overseeing the implementation of key features and ensuring smooth collaboration.
- Managed the Agile Scrum board, facilitating sprint planning, daily stand-ups, and retrospectives to ensure timely delivery of milestones.
- Described technical tasks, breaking down complex features into manageable units and coordinating work across the team.
- Collaborated with the team to estimate tasks, ensuring realistic timelines and effective resource allocation.
- Oversaw the app publishing process and managed regular updates to both iOS and Android stores.
- Worked on a photo editing application, enabling users to edit and enhance images with various tools, such as filters, cropping, and retouching.
- Integrated image processing libraries to optimize photo manipulation features, ensuring smooth performance even for large images.
- Focused on enhancing user experience (UX) with intuitive photo editing tools and real-time preview capabilities.
- Optimized the app's performance, addressing issues such as memory usage and response time during intensive image processing tasks.
- 20k+ downloads across various markets, 50+ positive reviews, and 3 years of solid presence on both the App Store and Google Play, demonstrating the app's reliability and popularity.

### React Native Developer

GetGain (Outsourcing Company)

- Started my career as a React Native Developer at GetGain, an outsourcing company, while in my third year of university.
- Contributed to the development of multiple client projects, focusing on building cross-platform mobile applications for various industries.
- Gained experience in the full development cycle, from requirements gathering and design to implementation, testing, and deployment.
- Worked closely with clients to understand project needs and deliver high-quality, scalable mobile applications.
- In my final year with the company, actively took part in project evaluations and played a role in estimating the complexity and timelines for new projects.
- Took on a leadership role within the mobile development team, coordinating tasks, and ensuring that the team met deadlines and project goals.
- Implemented and maintained CI/CD pipelines across multiple projects, using tools such as GitLab CI, Fastlane, and Jenkins to automate testing, building, and deployment processes.
- Improved team productivity and streamlined the deployment process by reducing manual interventions and ensuring smoother, more reliable releases.
- Actively mentored junior developers and shared best practices for mobile app development and CI/CD practices.
- Developed a deep understanding of React Native and mobile development, contributing to projects that helped clients achieve their business goals.
